

ELECTRIC TELETRUK | 30-19E / 35-22E

100% electric. Zero emissions.

MAX CAPACITY
3,000 - 3,500kg

MAX CAPACITY 2M
1,900 - 2,200kg

MAX LIFT HEIGHT
4m

GREATER PRODUCTIVITY.

With a choice of two models, the new JCB electric Teletruk range is designed to make the most of your time and space.

LIFT AND LOAD

The unique telescopic boom saves 70m² of space per truck with single side loading. A low 2.2m cab height allows loading and unloading inside containers and trailers.

GREATER SAFETY.

With superb visibility and precision control, the Teletruk makes all operators feel in total control within any environment and in any application.

IN COMPLETE CONTROL
Unique Load Motion Control feature prevents forward tip, for increased on-site safety.

GREATER VERSATILITY.

With forward reach, low height and small turning circle, the unique JCB electric Teletruk is the world's most versatile counterbalance lift truck.

HUGE VERSATILITY

With van, truck, container and rail loading, the Teletruk supports all areas of logistics operations.

GREATER CARE.

With zero emissions and low noise, both electric Teletruk models are ideal for 24/7 operation in urban environments and noise sensitive areas.

24/7 OPERATION

Machine acceleration can be reduced by 10, 20 or 30%, by pressing the eco button.

GREATER COMFORT.

The latest JCB CommandPlus cab ensures superior operator comfort throughout the working day, enabling you to gain maximum productivity.

COMPLETE VISIBILITY

The Teletruk's unique side-mounted boom design provides unrivalled 360° visibility for the operator.

ELECTRIC TELETRUK | 30-19E / 35-22E

SPECIFICATION.

MODEL	30-19E	35-22E
